

POLICE FORCE ROAD SAFETY DASHBOARD

Wiltshire Police

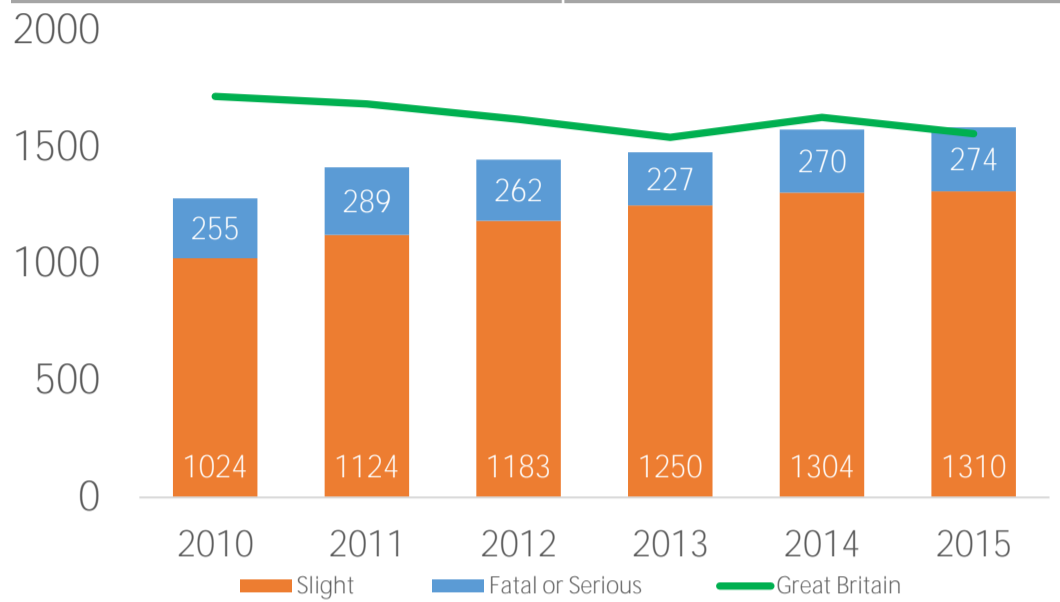

This dashboard analyses both collisions and the drivers involved in them on the roads in Wiltshire. It also uses national figures to allow a comparison of road risk against typical values seen elsewhere in Great Britain and produces a 100-based index for comparison purposes. Figures above 100 indicate a higher rate than the Great Britain average and the opposite is true for values below 100. Comparisons are based on traffic levels within each force area. Collisions involving casualties of all severity are used in the analysis, although there may be a differentiation for the most serious collisions where someone is killed or seriously injured.

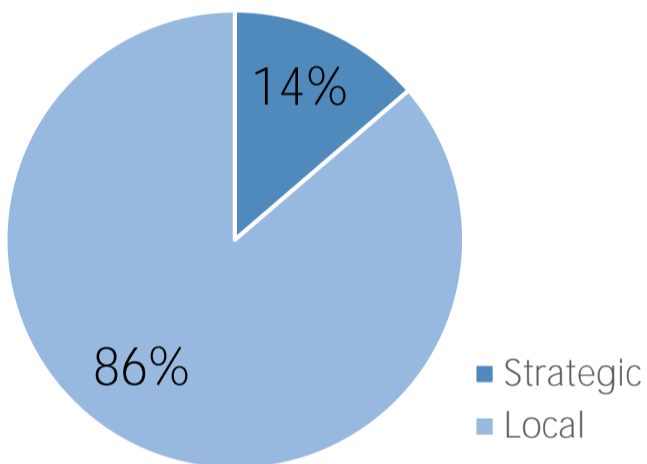

Collision Index

Collisions per Year

Collisions - Strategic vs Local Roads

Collisions by Speed Limit

Injury Collisions Involving (100 = national average, <100 = lower than average, >100 = higher than average)

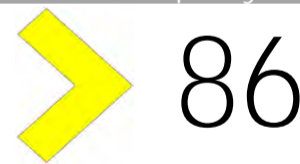

Drink Driving
75 drivers per year

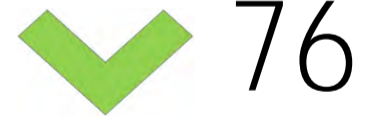

Mobile Phone
5 drivers per year

Speeding
70 drivers per year

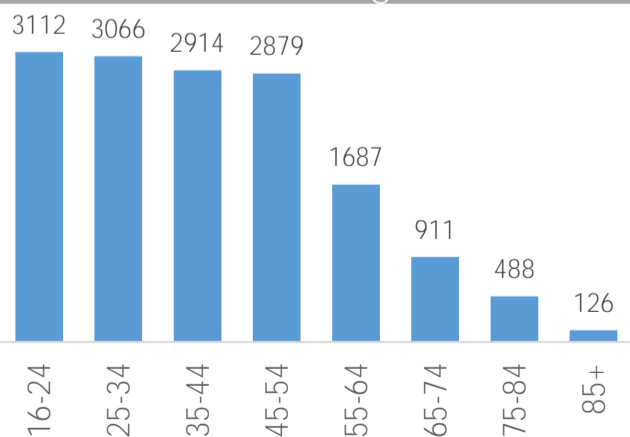

Red Light
26 drivers per year
